PROFESSIONAL SUMMARY

Final-year Computer Science and Engineering (AIML) student with a strong foundation in Python, machine learning, and software development. Passionate about building practical, real-world solutions through AI and continuously improving technical skills by working on hands-on projects and internships. Quick to learn new technologies, adaptable to different environments, and committed to writing clean, efficient, and reliable code. Seeking an opportunity to contribute to a collaborative team where I can apply my knowledge, gain industry experience, and grow as a software or AI engineer while creating meaningful solutions.

EDUCATION

Bachelor of Engineering – Computer Science (AI & ML)	Present
Maharaja Institute of Technology Mysore	

PROJECTS

Sentiment Analysis using NLP (Python, Scikit-learn, NLTK, Pandas)	2025
Developed an NLP-based sentiment analysis model for text classification using machine learning.	
Applied data preprocessing and model evaluation to achieve 85% classification accuracy .	
Rain Detection System using ESP8266	2025
Developed an IoT-based rain detection system to monitor rainfall, temperature, and humidity using ESP8266 sensors with real-time data visualization.	
Applied embedded systems, sensor integration, real-time monitoring, and IoT principles to build an efficient and reliable weather monitoring solution.	
AI Unit Converter (Flutter)	2025
Developed a cross-platform unit converter application using Flutter and Dart with offline functionality, intuitive user interface, and accurate unit conversions.	
Applied mobile application development, responsive UI design, and efficient data processing principles to deliver a fast and user-friendly solution.	
People Meet Agent	2025
Developed an AI-powered event management platform that automates event discovery, personalized recommendations, and attendee interactions.	
Applied software development, automation, problem-solving, and intelligent decision making principles to build a scalable and user-centric solution.	

Agritech Start up website

2026

Built a complete, responsive website from scratch for an agritech startup within **24 hours**, collaborating with a team to deliver a production-ready solution.

TECHNICAL SKILLS

Programming: Python, C++ (Oops) , Basics of Java

Machine Learning/AI: NLP, Basics of Deep Learning, Data Science

Databases & Tools: SQL, MongoDB, Data Visualization

Version Control: GitHub

Frontend: HTML, CSS

Soft Skills: Leadership, Communication, Team Collaboration

Achievements

2X ideathon winner

Finalist in multiple technical innovation competitions

ADDITIONAL INFORMATION

Languages : English , Kannada , Hindi

Interpersonal Skills : Communication , Teamwork and coordination
